

Textile Center Supply List

Cyanotype Printing on Fabric Anna Carlson

Please bring with you to class:

- \$5 materials fee, payable to the instructor, to cover cyanotype chemistry and related tools.
- 1/2 yard of cotton or linen fabric. The fabric must be white or a very light color. The fabric can be one large piece or divided into smaller pieces of scrap fabric depending on desired print size(s).
- The instructor will provide a variety of objects to expose onto the sensitized fabric; however students may bring additional objects if desired. Objects can be anything that creates a shadow ie. keys, real or fake flowers/plants, transparent patterned fabric, plastic bags, tools, etc.

There will be time reserved at the end of class for clean-up. Please help this process go quickly by assisting the instructor.

Parking is available in the lot directly behind our building, as well as our newly purchased lot at 3018 University Ave SE. Look for the green signs!
